

Victorian Alcohol and Drug Collection VADC 2018-19 Bulletin

Edition 6: 16 April 2019

VADC 2018-19 Bulletins must be read in conjunction with the VADC 2018-19 Data Specification

The VADC project team would like to acknowledge the significant effort all AOD providers have taken over the 2018-19 financial year to transition from the ADIS to VADC collection.

Thank you to providers that have committed to timely data submission and correction. Service providers are encouraged to continue to embed data quality improvement measures and processes to avoid or resolve data errors, in line with specifications and VADC bulletin releases. If you are having trouble understanding the errors in your validation report, please contact the VADC project team at VADC_data@dhhs.vic.gov.au, or discuss / log issues with your vendor.

VADC 2019-20

VADC data reporting requirements will be revised annually to align with AOD sector priorities, service delivery and performance management needs. Guidance on the requirements for handling service events spanning two financial years will be documented in Bulletin 7, along with further information on changes for 2019-20 VADC.

There are no future changes planned for 2018-19 other than those detailed in this bulletin. We are now prioritising work on the 2019-20 release and associated documentation.

1.1 Validation Issues Update

The following list describes current validation issues that have been identified and their status.

ID	Related validations	Issue Description	Update	Outcome
VI_4	AOD79, 80, 126 & 127	False triggers: triggers inappropriately for residential service streams.	Resolved – for deployment into VADC production 17/04/2019 02:00PM	Refer to Section 1.3 VADC Specification Update
VI_5	AOD 78, 79, 108, 109	False triggers: The way “today” is coded in validations causing the validation to trigger inappropriately.	Resolved – for deployment into VADC production 17/04/2019 02:00PM	Refer to Section 1.3 VADC Specification Update
VI_12	AOD108	Pseudocode description does not match validation requirement.	Resolved – for deployment into VADC production 17/04/2019 02:00PM	Refer to Section 1.3 VADC Specification Update
VI_13	AOD79	Pseudocode description does not match validation requirement.	Resolved – for deployment into VADC production 17/04/2019 02:00PM	Refer to Section 1.3 VADC Specification Update

ID	Related validations	Issue Description	Update	Outcome
VI_14	AOD123	Currently triggers an error, under review whether to change to warning. Issue update: referral OUT may require more than one day to complete. Following feedback from service providers, the validation has been downgraded to a 'warning'.	New Resolved – for deployment into VADC production 17/04/2019 02:00PM	Refer to Section 1.3 VADC Specification Update
VI_15	AOD142	Drug concern- Date after client review date	New Resolved – for deployment into VADC production 17/04/2019 02:00PM	Refer to Section 1.3 VADC Specification Update

1.2 Data Issues

The following describes the current data issues.

ID	Issue	Reminder
DE_4	Services not reviewing errors and resubmitting corrections by the due date	Critical errors should be addressed by COB the 15 th of the month following the reporting period. For example, where a service provider submits for the January 2019 reporting period on 07/02/2019, they have until 15/02/2019 to resolve all errors. Service providers who are unable to meet the deadline, are still required to correct data and resubmit. This must be repeated until zero errors are achieved for each monthly data file.
DE_8	No activity for entire reporting period	Data for open service events must be included even if no activity occurred for that service event in the current reporting period (VADC Compilation and Submission Specification, Section 5.5.1.5).

1.3 Postcode files updates

The following postcode locality combinations have been added to our reference file. An updated version of our reference file will be uploaded to the following website shortly

<https://www2.health.vic.gov.au/about/publications/researchandreports/postcode-locality-reference>

Postcode	Locality
2879	SUNSET STRIP
3364	JOYCES CREEK
5607	TIATUKIA
4300	SPRING MOUNTAIN
0873	CONNELLAN
2747	CADDENS

1.4 VADC Specification Update

ID	Edit name/description	Data elements	Pseudo code/rule	Source	Status
CURRENT					
AoD78	Outcomes- days injected and date last use is greater than four weeks ago	Outcomes-days injected last four weeks Drug Concern-date last use Drug Concern-method of use	Outcomes-days injected (≥ 0 and ≤ 28) AND Drug Concern-date last use < today - 28d when Drug Concern-method of use = 3	DHHS	warning
FUTURE					
AoD78	Outcomes- days injected and date last use is greater than four weeks ago	Outcomes-days injected last four weeks Drug Concern-date last use Drug Concern-method of use Outcomes-client review date	Outcomes-days injected (≥ 0 and ≤ 28) AND DC-date last use !=01011900 AND DC-date last use < today Outcomes-client review date - 28d AND DC-method of use = 3	DHHS	warning

ID	Edit name/description	Data elements	Pseudo code/rule	Source	Status
CURRENT					
AoD79	Outcomes- days injected is zero and date last use is within last four weeks	Outcomes-days injected last four weeks Drug Concern-date last use Drug Concern-method of use Contact-relationship to person of concern	Outcomes-days injected last four weeks = 0 and Drug Concern-date last use > today-28d, AND Drug Concern-method of use = 3 AND Contact-relationship to person of concern =0	DHHS	warning
FUTURE
