The Forest

ENDING THE CYCLE OF REINCARCERATION FOR PEOPLE WHO USE DRUGS

AT BURNET INSTITUTE, WE PROUDLY ACKNOWLEDGE
THE BOON WURRUNG PEOPLE OF THE KULIN NATIONS
AS THE TRADITIONAL CUSTODIANS OF THE LAND ON
WHICH OUR OFFICE IS LOCATED AND RECOGNISE
THEIR CONTINUING CONNECTION TO LAND, WATERS
AND COMMUNITY. WE ACKNOWLEDGE ABORIGINAL AND
TORRES STRAIT ISLANDER PEOPLES AS AUSTRALIA'S
FIRST PEOPLES AND ACKNOWLEDGE THAT SOVEREIGNTY
WAS NEVER CEDED. WE PAY OUR RESPECT TO ELDERS
PAST AND PRESENT, AND EXTEND THAT RESPECT TO
ALL FIRST NATIONS PEOPLE.

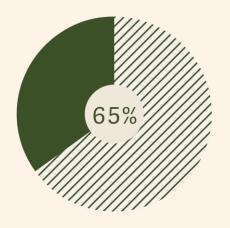

Burnet Institute

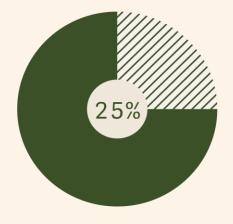

- Medical and health research institute
- Accredited international non-governmental organisation
- Australia, Indo-Pacific, and Africa
- Multidisciplinary teams
- Proud history

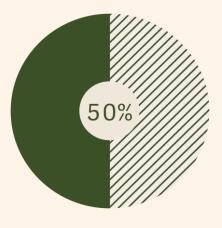

Prisons do not rehabilitate people who use drugs

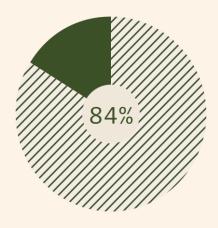

of those in prison report recently using drugs

of those in prison report recently injecting drugs

of people who use drugs return to prison six or more times after their first release

of people with opioid dependence return to prison within two years of release

Prisons cause and exacerbate harm

Of people with recent drug use histories released from prison:

One in four will be released into homelessness

85% will face unemployment

44% will experience mental ill-health

9%
will self-harm

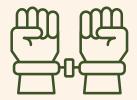

9-13%

will overdose

12% will attempt suicide

An unsustainable increase in cost

Imprisonment rate is rising from 128 to 214 per 100,000 over the decade

Victorian prison costs have increased by 74% since 2014

↑50%

Reincarceration above 50% and rising 20x

Repeatedly reincarcerating people costs 20 times more than successfully reintegrating them into the community

This cycle has been recognised in multiple policy frameworks and reform initiatives:

- Royal Commission into Victoria's Mental Health System
- Inquiry into Victoria's Criminal Justice System
- Early Intervention Investment Framework Paper

Telling new stories, building new worlds

- Crisis of incarceration or crisis of imagination?
- Role of abolition and lived experiences

Welcome to The Forest

Foundation partners

WORKING TOGETHER TO END THE CYCLE OF REINCARCERATION FOR PEOPLE WHO USE DRUGS

Planting the seeds for change

A public health model to end the cycle of reincarceration for people who use drugs

• Leverages meaningful partnerships and will place Victoria at the leading edge for systems change

• Strongly underpinned by evidence, building on what works

 Co-designed and led by and for people who use drugs and who have been incarcerated

A new ecosystem for Victoria

We integrate public health research, lived experience and community-led design to grow:

- A safe place for people to go
- Meaningful things for people to do
- People feeling secure in their health
- People being consistently supported

An environment where people can thrive

Peer mentoring

Peers provide support, inspire hope, and nurture positive relationships.

Health, housing, social supports

Multidisciplinary teams address the long-term needs of each person before, during, and after release and for as long as people need.

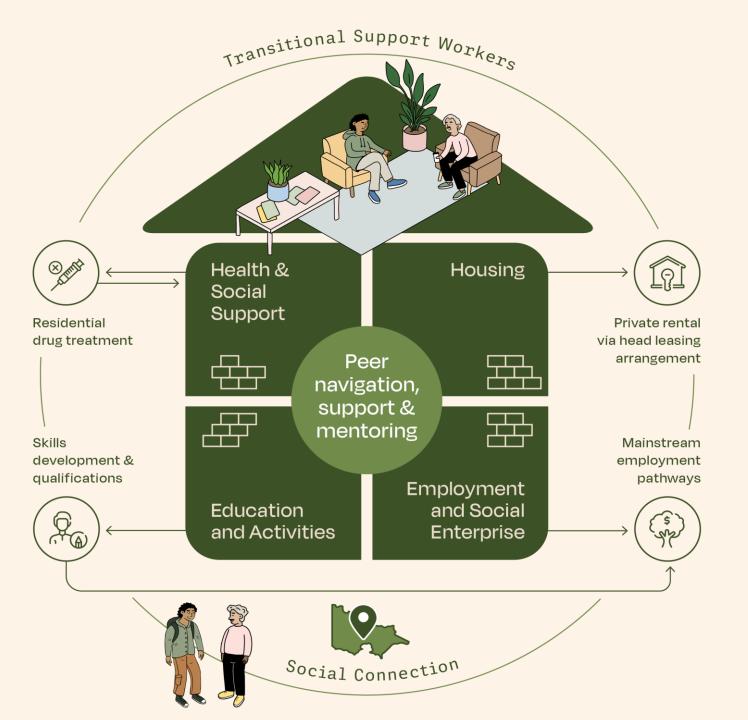

Social enterprise

Pathways to employment, including social enterprises that support skill development and on-the-job training.

Activities and social connection

Recreation and education support programs promote connection and belonging.

On the ground

A four-year community trial of The Forest:

Will be in the north-west region of metropolitan Melbourne

Will recruit **1,100**participants
through in-reach
to prisons

will start with **200**people in the first

year and add 300

more people in each

following year

Will create more than **100** jobs

Modelling approach and key findings

Method

Detailed cost benefit analysis adhering to DTF guidelines for economic impact assessment

- Literature and data review of expected impact of similar programs
- Detailed probable risk model informed by Burnet PATH and SuperMIX data
- Base Case and Impact Scenario projections for justice, health & other govt costs by risk cohort

Scenarios

Four Program Scenarios and seven Impact Scenarios

- Scenarios 1-3: Halving risk of unstable housing and unemployment in Year 1, and through time
- Scenarios 4-6: 50%-60%
 reduction in reincarceration
 risk, reduction in ED
 presentations
- Scenario 7: Combined ((Scenarios 1, 3 and 6)

Findings

Strong net economic and social benefits expected from the program

- BCRs of between 3.0 and 3.8 depending on the Program Option implemented and the level of impact achieved
- Breakeven if reincarceration risk reduced by 18 per cent
- Strong alignment to EIIF and PAD policy objectives

A 'no regrets' investment

We engaged Insight Economics to conduct rigorous independent economic modelling, which demonstrated The Forest could deliver:

3:1 benefit-cost ratio

	Over 4 years:	Over 10 years:
Avoided costs for Victoria	\$303m	\$2.3b
People supported	1,100	10,100
Fewer episodes of incarceration	380	3,000
People employed	195	2,500
People in stable housing	200	1,300

Ending reincarceration in Victoria

2019-2024

Operating model co-designed with people with lived and professional experience

Economic modelling

Support required

Set-up Phase

\$2.5 million in funding is required for an 18-month program of work to develop:

- Program alignment and integration with government agencies and programs
- Implementation planning
- Pathways and partnerships to support investment and social enterprise

Leading to:

 Robust, evidence-informed investment case for the Victorian Government

Commence late 2026

Launching The Forest in Victoria

- Implementation of a four-year trial costed at ~\$100 million
- · Deliver on Victoria's reform agenda
- End the cycle of reincarceration for 1,100 people leaving prison

Leading to:

- \$303 million in avoided costs
- Individual, family, community and economic benefits
- Clear evidence on what works
- Roadmap for systems change

Thank you
